

## FREE LIME SEALER CONCENTRATE

### KEY BENEFITS

- Seals concrete
- Prevents limescale build up
- Easy to use
- Complies with BS8102:2009

### DESCRIPTION

N-Virol Free Lime Sealer is specifically formulated for the control of primary and secondary efflorescence in concrete mixes. This product must be used prior to the installation of Type C cavity membrane to prevent limescale build up in between the membrane studs and within the drainage system (perimeter channel, sump chamber, pump etc).

### PREPARATION

Clean the surface to be treated, removing any dirt, mould or loose coatings. Mould release agents or floor paints should be completely removed. Structural defects must be completed prior to application. Free Lime Sealer can be applied to damp substrates but cannot be applied to wet substrates. Remove all standing water prior to application.

### APPLICATION

A surface temperature above 5°C is recommended. One coat is typically sufficient however a second coat may be required for porous substrates. Wear relevant personal protective equipment.

#### 1 Litre Concentrate:

Pour 8 litres of clean water into a clean spray applicator. Empty contents of 1Ltr Lime Sealer into spray applicator, fill 1Ltr container with clean water to wash the container and empty into the spray applicator to make a 10 litre solution. Apply to all relevant areas ensuring that the surfaces are thoroughly wetted. Avoid using a fine mist. Avoid over-application (i.e. pooling)

#### 5 Litre Ready to Use:

Pour contents into clean spray applicator. Apply to all relevant areas ensuring that the surfaces are thoroughly wetted. Avoid using a fine mist. Avoid over-application (i.e. pooling)

### COVERAGE

Coverage will mainly depend on the porosity of the substrate. 10 litres of diluted treatment will cover approx. 100m<sup>2</sup>. 5 Litres of ready to use treatment will cover approx. 50m<sup>2</sup>.

### CLEANING

Remove any overspray and clean equipment with water. Splashes should be removed as soon as possible as they will be extremely difficult to remove once cured.

### STORAGE

Do not store in temperatures below 5°C. This product must be used within 12 months from date of purchase. Protect from frost.

### PACKAGING

#### Available in:

- 1 Litre Concentrate
- 5 Litre Ready to use
